Summary

Driven and skilled welder & fabricator with 5+ years' experience in high-production and custom fabrication environments. Proficient in MIG, TIG, and FCAW welding; passed 2G, 3G, 4G bend tests on 1/4" steel plate and certified in 3G open-root uphill FCAW on 1" steel. Currently fabricating structural steel and aluminum components at Draper Metals with precise fit-up, reliability, and attention to finish.

Core Skills

MIG (GMAW) • TIG (GTAW) • FCAW / Open-root 3G • Fit-up & Layout • Blueprint Reading • Grinder & Finishing • Structural Welding • Sheet Metal • Aluminum Fabrication • Safety & QC

Experience

Welder / Fabricator — Draper Metals (Jan 2025—Present)

- Fabricate and weld structural steel components including columns, railings, frames, and bollards for commercial and residential projects.
- Perform MIG (GMAW), FCAW/flux-core, and TIG (GTAW) welding on mild steel and aluminum.
- Read shop drawings/blueprints, lay out parts, complete fit-up, and verify dimensions to meet tolerances.
- Prepare, grind, and finish welds while maintaining safety and quality standards.

Welder / Fabricator — SuperSplitter, West Bridgewater, MA (2023—Jan 2025)

- Fabricate and weld components for kinetic log splitters using MIG.
- Build frames, flywheel racks, and gear assemblies to precise tolerances.
- Perform fit-up, assembly, and quality checks to ensure proper alignment and function.

Welder / Fabricator — Core Concepts, Franklin, MA (2022—2023)

- Performed MIG, TIG, Stick, and Flux Core welding.
- Read blueprints and fabricated components to specifications.
- Organized tools and materials to optimize efficiency and uphold safety standards.

Welder — General Dynamics Electric Boat, North Kingstown, RI (2021—2022)

- Enhanced welding quality by following precise procedures.
- Assisted engineers and designers on complex parts and assemblies.
- Used MIG, TIG, Stick, and Flux Core methods and verified work through inspections.

Welder/Fabricator — Safe-T-Cap, Cranston, RI (2019—2021)

- Developed customized welding approaches for unique materials and jobs.
- MIG, TIG, Stick, and Flux Core welding in all positions.
- Delivered high-quality workmanship, reduced rework, and supported junior welders.

Certifications & Education

- 2G, 3G, 4G bend tests on 1/4" steel plate • Certified in 3G open-root uphill FCAW on 1" steel plate
- AWS D1.1 Welding Certification • New England Institute of Technology — Welding Program
